Setting up automatic clearing of Cookies and Cache on browser exit.

Choose the browser you would like instructions for:

Google Chrome

Mozilla Firefox

Microsoft Internet Explorer

Google Chrome

Google Chrome doesn't include the ability to automatically clear all your private data when you close it. However, you can have Chrome automatically clear cookies on exit or use an extension to have it automatically clear everything.

To get started, open the Settings screen from Chrome's menu.

If you want to clear all your private data when you close Chrome, install the <u>Click&Clean</u> <u>extension</u> from the Chrome Web Store.

After installing it, click the Click&Clean button on your browser toolbar and select Options.

Enable the "Delete private data when Chrome closes" option under Extra. You can control which types of data will be automatically deleted using the options in this window.

Click the Delete button to customize which types of data Internet Explorer will clear. You may want to uncheck "Preserve Favorites website data" or Internet Explorer will keep cookies and cache files for websites you have saved as favorites.

Click the Delete button when you are done. Internet Explorer will immediately clear your private data and then clear it each time you close your browser.

Delete Browsing History
Preserve Favorites website data Keep cookies and temporary Internet files that enable your favorite websites to retain preferences and display faster.
Temporary Internet files Copies of webpages, images, and media that are saved for faster viewing.
Cookies Files stored on your computer by websites to save preferences such as login information.
History List of websites you have visited.
Download History List of files you have downloaded.
Form data Saved information that you have typed into forms.
Passwords Saved passwords that are automatically filled in when you sign in to a website you've previously visited.
ActiveX Filtering and Tracking Protection data A list of websites excluded from filtering, and data used by Tracking Protection to detect where websites might be automatically sharing details about your visit.
